

A professional marking machine manufacturer

Focusing on

Marking/Cutting/Welding/Cleaning machines

For over 15 years

This is Luyue CNC, a professional marking machine manufacture in China, focusing on marking machines for over 15 years.

In the production work and after-sales service, identification and traceability play a very important role. More and more companies are beginning to realize the importance of the unique identification code of each product in the identification link in the production process and the traceability link in the after-sales service.

The purpose of the Luyue marking machine is to help various manufacturers mark on their own products to ensure that they can identify their products more easily, which safeguard their interests.

What we product are electric, pneumatic and laser marking machines of different operating types, including handheld, portable, benchtop and integrated, which could help you trace and identify all kinds of your products.
